

2024 Value Based Healthcare Forum

Creating a Viable Clinical and Financial Structure that Produces Optimal Value-Based Healthcare Results; Engaging Physicians and Patients; Implementing Effective Performance Measures; Managing Reimbursement Opportunities and Challenges; and More!

September 23 – 24, 2024 • The Roosevelt, A Waldorf Astoria Hotel • New Orleans, LA

Conference Overview

The shift to value-based healthcare and reimbursement has greatly impacted the way healthcare is delivered and billed within hospitals and other healthcare providers. Transitioning from fee-for-service to value-based care has created several challenges as well as opportunities. Creating an optimal delivery of care system has been at the forefront of value-based healthcare. Providers are incentivized as well as penalized based on the quality of care that is administered. It will be critical for providers to effectively administer quality of care, as well as manage the cost shift when transition to value-based healthcare.

This conference will examine several strategies, models and case studies to understand how to best navigate the value-based healthcare system. Leading hospitals, health systems, healthcare providers and subject matter experts will present effective models to employ for a viable clinical and financial integrated value-based healthcare structure.

Don't miss this discussion-filled event filled with a variety of providers and value-based healthcare leaders and team members who will share their up-to-date experience and enriching insights. The more you hear, the better prepared you and your team will be to thrive in this new healthcare paradigm and build solid strategic programs.
